

Best innovation 2010 in the field of health development

QUANTEC® wins the Gold Medal

On 16th May 2010, QUANTEC®, as a “System of instrumental biocommunication”, wins the Gold Medal for the best innovation in the field of health development over a host of competitors.

This prize was awarded on the occasion of the 2nd “International Authors’ Salon of Innovations” on the Crimean peninsula. The jury consisted of scientists from both Russian and Ukrainian universities, ministries and private institutes.

1. The President of the international jury which awarded the prize:
Professor Dr. med. B. A. Astafev
Russian Academy of Natural Sciences
2. The President of the Award Commission:
Professor Dr. psych. N. W. Masolva
President of the Academy of Noospherian Sciences and Education
3. The President of the 2nd International Authors' Salon of Innovations:
Dr. phil. W. B. Ivanov
Academy for Noospherian Sciences and Education

Members

- Russian Academy of Natural Sciences
- Ministry for Education and Sciences of the Ukraine
- Academy for Noospherian Sciences and Education
- Institute of Innovative Technologies and New Education, Kiev
- Kharkov National University “Karasina”, Ukraine
- Staatliche Pedagogic University “Skovoroduj”
- National Education Academy of the Republic of Kazakhstan “Altujnsarina”
- Academy of Sciences of the Crimea
- Institute for Holistic Thinking, Odessa
- Haus Wernadskij, Kharkov
- Centre for fur Intellectual Development “EIDOS”, Sevastopol
- International Peace Fund

We were completely surprised by this honour, and are delighted that our many years of development work have been recognised by such an eminent jury.

The honour was preceded by tests on patients mainly in Moscow and Odessa, whose assessment clearly confirmed the potential of QUANTEC® in health development. The convincing features of these tests included the accurate causal diagnostics, the psychosomatic evaluation (ExpertScan®) and the therapy results.

The jury was also impressed by the way in which the latest findings in quantum physics have been incorporated into QUANTEC®, and the easy handling in practice.

It is also no accident that QUANTEC® received this honour in eastern Europe.

Russia has for decades been a worldwide leader in the field of biocommunication and awareness technologies. Its application in space technology for the health monitoring and treatment of astronauts in space has also become known to us in the West since the fall of the wall. We are therefore particularly proud of having won the Gold Metal here - the honour comes from a highly reputable source.

QUANTEC® is currently also being investigated by scientists from the West, and is also achieving recognition and success here; we will report on this here as soon as the research results are published.
