Dear Mrs. Kraus,  
Dear Mr. König,

Thank you very much for the effective support in the integration of our cat into our family life. We really love our cat, and are touched by how positively everything has changed during the short time of the transmission.

Silvester is now a very tractable, playful and attentive cat – just as cats are at this age!

Thank you very much for your help

The M. family

We hereby agree to publication of the consultation.
