

Sports consultation:

The initial situation

First appointment on 13.10.2007

An experienced sportswoman came to our QUANTEC® presentation. In this context, we described some case examples and usage possibilities – including in the field of competitive sport. This aroused her curiosity, and we started to discuss the matter. Her problem was that she had not been able to train as much as necessary over recent months because of occasional pains in the knee, and a Marathon run was due to take place in Munich in a few days. Since she felt that she had not trained properly for the event, she did not know how things would go.

We told her that we would be happy to assist her in this matter, although we could not promise whether this would result in the desired success at such short notice. The support would be provided in the form of a target transmission by QUANTEC®. After more detailed explanation of the procedure, she agreed to it, and we worked out a HealingSheet*.

This included the following points:

- Stamina
- Successful Marathon
- Supply of the body and the musculature
- Calm and relaxation
- Self-confidence and optimism

* The QUANTEC® HealingSheet is a therapy program that contains all affirmations and remedies that are broadcasted to the client or the target. The HealingSheet is the result of an automated scan performed by QUANTEC®.

Objective:

Optimum stamina and success for the Marathon run in Munich.

She was now able to confirm the individual entries in the Healing Sheet, and was confident and relaxed about how the next day would go. The relevant Healing Sheet was transmitted for three days.

Result:

QUANTEC® once again confirmed its effectiveness in this case! We were all delighted and deeply moved by the result of the Marathon run. She made her preparations in all calm, and drove to Munich with her husband. She persevered well throughout the complete run, with energy reserves and full of joy and optimism. She did not feel herself over-taxed in terms of condition. She was also rewarded at this event by beating her personal best time by 10 minutes.

All this for the good of the whole.

Thank you very much
