

Consultation in the field of: Animal behaviour - Psyche

The initial situation:

First appointment on 02.09.2009

Mrs. E. M. explained to us that since a few days ago, she had taken into her house a small cat from her brother-in-law's farm. The cat is currently approx. 10 weeks old and such a "live wire" that the whole family is well-disposed towards it and wants to make it feel at home. During the first few days everything went quite well, although "Silvester" then became increasingly more aggressive and intractable. He also refused to use his cat-litter tray, and instead repeatedly sought out a secluded corner to "do his business". She was looking for active support in integrating the cat into the family.

Our task:

- 1) Improvement of the psychic balance
- 2) Integration into the family
- 3) Normal behaviour in accordance with age

These criteria were taken into account in the compilation of the HealingSheet,^{*} incl. a manual selection of the Bach blossom "Rescue".

^{*} The QUANTEC® HealingSheet is a therapy program that contains all affirmations and remedies that are broadcasted to the client or the target. The HealingSheet is the result of an automated scan performed by QUANTEC®.

The resulting HealingSheet was set for transmission for two weeks.

Changes during this time:

During the first few days, Silvester calmed down and became much more tractable, and his aggression also abated very quickly.

After one week, more normal behaviour according to age set in. He is still very agile and playful, just as he should be and is natural. The independent use of the cat-litter tray was the greatest relief for the family. Harmony has therefore been restored, and the new member of the family fully integrated.

Everyone is thrilled and relieved.

We wish you continued fun and enjoyment.
